Art Unit: 3723

DETAILED ACTION

1. Receipt is acknowledged of Applicant's Preliminary Amendment, filed June 7, 2002.
2. Receipt is acknowledged of Applicant's Prior Art Statements, filed July 31, 2002, September 19, 2002, November 19, 2002, December 31, 2002, April 25, 2003, and July 3, 2003, respectively.
3. Claims 1-49 are presented for examination.
4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, 22-32, and 40 drawn to a method of conditioning a planarizing surface, classified in class 451, subclass 21.
 - II. Claims 18-21, 33-39, and 41-49 drawn to an apparatus for conditioning polishing pads, classified in class 451, subclass 72.
5. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed may be performed by another materially different apparatus, such as one lacking a controller, wherein data for evaluation of pad condition, and formulation of polishing parameters are collected and evaluated manually.

Art Unit: 3723

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication should be directed to Robert Rose at telephone number (703) 308-1360.
